Supporting You

Welcome

Welcome to your Morrisby career analysis.

Whether you are just beginning to consider career or study options, or you are looking for a change in career, we are here to inspire and help you realise your potential.

This report is the beginning of your journey with us. Everything in this document is personalised to you and based on what we have found out about you so far. At any time, you can log in to your personal area on our website, re-visit your results, research the pathways into careers, investigate job specific information and also search for courses and research apprenticeships.

When reading this report, please remember that we are not here to tell you what to do, but to give you the tools and information to support you in making the right decisions for you.

About Us

Deciding on a career is not easy. Understanding the options available to you in the first place is hard enough, but then working out what you are best suited to, and how you can achieve your goals, is difficult.

With our expert analysis, we can help to make your journey easier by giving you the tools to aid your decision making.

- Established in 1967, we are world leading developers of Careers guidance systems and services.
- Experienced providers of matrix accredited and ISO quality assured Careers information, advice and guidance.

Using This Analysis

Introduction

When you took your Morrisby Profile assessments, we measured your verbal, numerical, and abstract reasoning as well as your spatial, and mechanical ability. When you took your Morrisby Profile assessments, we measured your verbal, numerical and abstract aptitudes. We also took a subjective snapshot of your interests, preferences and motivations.

We then analysed all of your results, which were presented to you on our website. This report is a summary of what you have seen on the website so far. In addition to this report, your own personal webspace also features:

- Career suggestions tailored to your abilities, interests, personality and preferences
Help with choosing Year 11/12 subjects
- Suggestions for Higher and Further Education based on your make-up and career intentions
- Thousands of links to further information covering careers, education and training

All of the results and recommendations are available both in this report and in a dynamic and interactive format on our website.

Every time you make a change to your preferences on Morrisby Profile, this report will update and you can download it again.

IMPORTANT

We want this analysis to help inform and support your decisions for the future. As with all assessments, the results reflect your performance and feelings on the day. We hope and expect these to be accurate, but on occasions, people do not perform as well as they should. If you feel that your results are not a true reflection of you, please talk it over with a careers adviser.

Aptitudes

Your Aptitudes

The assessments you completed measured your verbal, numerical, and abstract reasoning as well as your spatial, and mechanical ability. Your results have been analysed and compared with others of a similar age to you. Please remember that this is not about measuring individual scores, but understanding where your relative strengths lie.

We use this information to build a picture of you and to identify your potential. This profile also informs your career suggestions.

Verbal, Numerical & Abstract

Your high abstract result, lower numerical and verbal results suggest that you might prefer working with real objects, diagrams, plans and quantitative analysis. These are useful skills for engineering, technology and some commercial areas. You may prefer learning from charts, models, videos and your own experiences rather than just from books or lectures.

You could look at careers which match this pattern, such as science and laboratory work, technical design, surveying, engineering, as well as working with computers and data processing and many commercial careers such as banking, insurance, finance and so on.

Spatial and Mechanical

Your score on the spatial assessment was above average but a little lower on the mechanical. Whilst you can cope with the mechanical principles of machinery and everyday living, it's not your strongest skill. You have plenty of practical ability for everyday life and for the great majority of jobs. There may be a few highly practical areas that you could find a little laborious.

What is Being Measured?

Verbal

This assessment measured the ability to use words and indicates potential in dealing with verbal information, whether written or spoken. High scores can indicate a comfort in reading, writing, and speaking. Careers which need this ability include teaching, law, journalism and sales. Can also indicate a preference for learning in a traditional way, using books and attending lectures.

Numerical

This measured the comfort or intuitive insight when using numbers or data. High scorers often tend to be more logical or organised, with a preference for weighing up the pros and cons of a situation. They may also be less interested in compassionate or caring professions. A high numerical score would indicate a preference for work with numbers in commercial fields, such as accountancy, sales, insurance banking and finance.

Abstract

This assessment measured the ability to deal with complex problems. This indicates a preference for dealing with real things and visual information such as charts, diagrams and pictures. High scorers often 'see' relationships between things and will learn by doing and observing, rather than talking. Such people would be more comfortable with demonstrations, rather than a traditional, book-based approach to learning. This ability is also linked with many technological and scientific areas, and therefore can be associated with engineering, research and development, design and information technology.

Spatial

Designed to measure spatial ability. This facility is useful for occupations or activities where visual-spatial skills are important, such as design, engineering and electrical work. It is also useful for tasks that involve the appreciation of plans, diagrams and flow-charts. High scorers may also feel comfortable when dealing with the overall plan of a project rather than the details.

Mechanical

Designed to measure the ability to appreciate and solve mechanical problems. It does not rely on specialist knowledge, although it does require an ability in solving straight-forward practical problems, and an understanding of how things work and are put together. It is therefore useful for engineering and technical careers. High scorers may feel comfortable when dealing with the details of a plan, and may adopt a step by step approach to tackling projects.

Interests

Introduction

This section examines the findings from the Aspirations Questionnaire. This asked you about your career interests, your specialist interests and any preferences you might have about your work environment, the type of organisation or your role within it. Your results are shown and described on the following five pages. On the website you will also find a breakdown showing how well your results support working in each of 49 different career areas.

Your Interests

We asked you questions about your attitude to working with people, information and things and how important each one was to you. You can see the results below. Remember, this is based on what you told us and you can amend your responses at any time.

People

Information

Things

You are most interested in a career path where you help other people to get the most out of their lives. This includes education in the broadest sense, counselling, advice and guidance. You would enjoy helping people to achieve their true potential. The results suggest that you might also enjoy scientific methods and research. In the purest sense this might be physics, chemistry or biological research but you also need to remember computer science,

You

- > Advising
- > Instructing
- > Scientific
- > Researching
- > Caring
- > Supportive
- > Persuading
- > Influencing
- > Commerce
- > Analysing

forensics, materials, geology, meteorology, psychology and many others, all of which rely on the scientific method. Additionally you appear interested in a career where you care for other people on a daily basis. Perhaps young children, or the elderly or others who for some reason or another need help in looking after themselves. Additionally you might consider the types of career where you would be working with people in a professional, rather than personal manner. You would enjoy guiding them to make the best decisions. This might include management, sales, politics, marketing, advertising, broadcasting and many others. You also show some interest in a career dealing with numerical records and quantitative analysis. This often means working in commerce or finance; banking, insurance, trading and brokerage, risk analysis and accountancy. However, all organisations require some numerical analysis so it's an area with many and varied opportunities. The results show that you are not interested in spending your time writing or working with the written word or verbal communication. You would also like to avoid working in IT, centering on screen-based activities, programming, data analysis, hardware and the like. Similarly you would like to avoid working in a directly practical area; jobs which involve making, maintaining or moving physical objects. Neither do you seem keen on a career working as an artist or designer, where success is dependent upon the aesthetic quality of the item you create.

Your Specialist Interests

Specialist Interests may form an important part of your career choice, or you might prefer to keep them separate to your job. You can decide on how much they should influence your career suggestions by selecting "Specialist Interests" when choosing what to focus on, on the website.

Sport

Of the five areas (music, sport, performing arts, languages, art & design) you are most interested in sport. You are not interested in music, languages or performing arts.

Your Work Style

Work Style

Here we are looking at how you go about solving problems, what motivates you and how you like to work. The graphs below are based on what you have told us so far.

You want to succeed and are likely to set yourself very ambitious targets. It is important for you to achieve your goals and you want to work in an area where you can personally make a real difference. You appear industrious and are prepared to put in a good deal of effort to achieve your goals. There is a risk that your work-life balance could tend to be too much on the 'work' side but you are likely to achieve a great deal. Your answers suggest that you very much like to make your own decisions and do things the way you want. You wouldn't like to be continually told what to do by a manager or supervisor. Perhaps you see yourself working independently – perhaps working for yourself, or developing a portfolio career. Independence is a very useful trait, but you might find it frustrating to be part of a big group with little autonomy. However you'll probably have to put up with it, whilst you develop your skills and gain the experience you'll need later on.

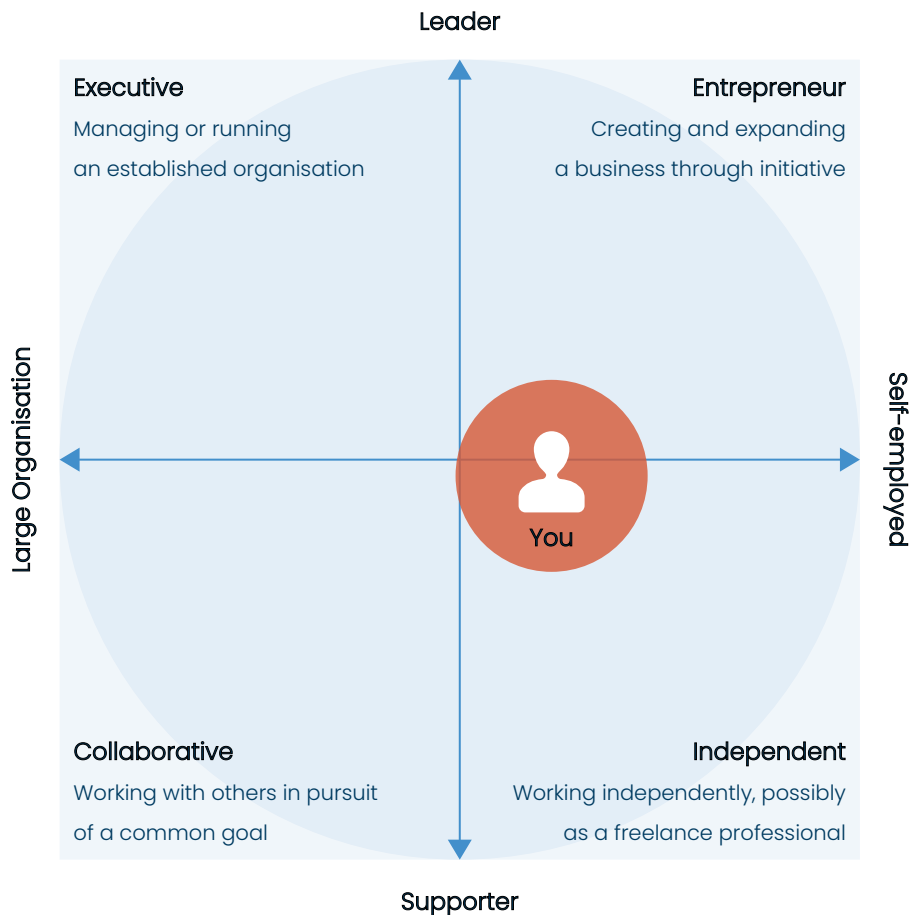

Providing you felt comfortable with the work you would be prepared to be the leader within a group of people. You could take responsibility for the actions of others and might want to consider careers where you assist or advise others on what to do. You like to work in your own way and would prefer a career that offered variety and the opportunity to do things as you see best rather than following a set procedure.

You

- > Determined
- > Industrious
- > Ambitious
- > Purposeful
- > Smaller company
- > Independent

Organisational Role

This graph shows the type of organisation and role that you aspire to. We work this out by looking at your preferred role in an organisation (from team member to leader) and comparing it with the type of organisation you want to work in (from a large multi-national, to working for yourself). You may find that these attitudes can change over time, remember, you can update the results by re-taking the aspirations questionnaire.

You appear happy to take the responsibility of working in a small organisation or even working independently. You don't need the protection of massive company. Happy to take the lead when required, but equally content as a team player.

Workplace

Your Preferred Work Environment

This is what you told us about where you would most like to work; whether you prefer the idea of being inside or outside and how important it is to you to work alone or with others.

Regarding workplace, you like the idea of a comfortable, well-equipped building where you can meet new people frequently. You don't like the idea of being stuck away on your own in an office and nor do you want to be outside in all weathers. There are many careers with many employers which will provide this combination.

You

- > Meeting People
- > Nice Surroundings
- > With the Public
- > Non-physical

Personality

Your Personality Type

Personality describes the way we think, feel and behave – in short, it is what makes us unique. When considering careers, we often think about having the right skills and qualifications, but having the right personal qualities can be just as important. Our personality type, and the way we act and behave will influence our suitability for some careers more than others. This profile also informs your career suggestions.

Scientist

- > Realistic
- > Rational
- > Logical
- > Independent
- > Insightful
- > Reasoned

Independent, innovative and insightful but potentially a little hard to please. Theoretical in outlook with a strategic, logical approach with a scientific methodology. Self-assured, ambitious, organised and likely to expect high standards from self and others.

When you make decisions you prefer to adopt an analytical approach, and work out the most logical solution to a problem. Whilst you accept that some decisions are based on feelings rather than facts, you are keen to find the technically correct solution even if it will not be received well by others.

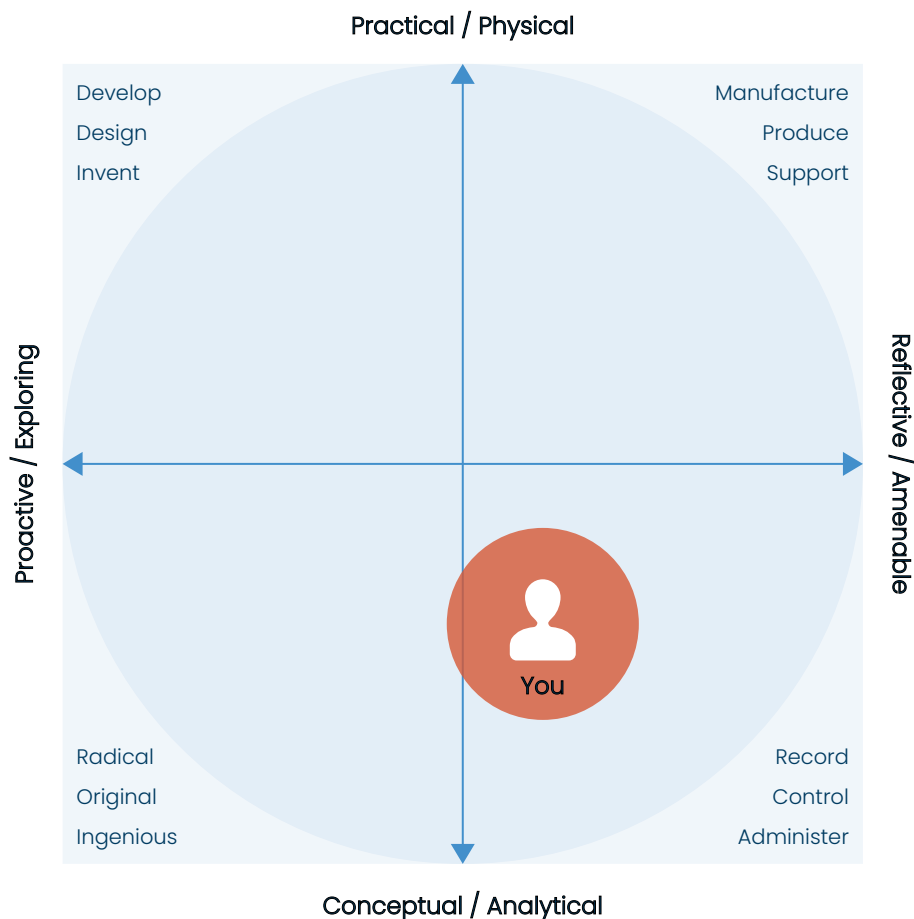

You would prefer a well ordered and structured lifestyle. Whilst you enjoy occasional surprises, you prefer the important things in life to be well thought through, organised and as definite as possible. Some things need to be planned well in advance to ensure you get the most out of them.

Also of importance is your introversion result. Whilst sociable, you seem content with your own company and are happy to work on projects independently. Perhaps you might seem reflective and a little reserved to others. You don't seek out an audience for your activities but enjoy joining in with others. You show a preference for developing ideas, mentally exploring new possibilities and breaking with tradition. You are keen to use your imagination and are comfortable in the worlds of art, literature and emotions.

Learning Style

How do you learn best?

People continue to learn throughout their entire lives. Some things need a direct practical approach; it's difficult to learn to ride a bike, or play an instrument, just from a book. Other things are suited to a more academic approach; Maths and Literature, History and Philosophy. Some require a bit of both; Science, Geography and IT. In addition, many other attributes will influence how and what you prefer to learn. Which do you find more memorable; hearing something, seeing it, or physically handling it? Do you like to challenge and question information, or are you more accepting of the facts presented to you? Are you someone who prefers to know a great deal about one thing, or who wants to be aware of a whole range of things, but without going too deep into them? Do you like to learn within an enthusiastic group or to work alone at your own pace?

The results suggest that you are primarily a facts and ideas person, as indicated on the graph above. Those with this type of result tend to like

knowing about things, what happened when, and who did what. You appear open and receptive to new ideas and would probably enjoy analysing, reflecting and drawing conclusions from what you have learned. You would probably enjoy learning new things in lessons, from books and other media. You seem open to new ideas and have the imagination to develop your own thoughts and ideas. Perhaps working in a knowledge-based area such as media, law, government, commerce or office work would be worth considering.

Working with others or individually?

Some people are most comfortable working on their own, others are happier working with others in a group.

In most situations, you seem content to learn and work independently from others. Perhaps you prefer working at your own pace, in your own way.

Perhaps you find yourself easily distracted when in a group. Being able to work successfully with other people is an important skill and this might not come quite as naturally to you as it does for others. As such, you need to think about making positive contributions and not appear a reluctant group member. In any event you have the advantage of being content when working on your own.

How do you focus?

When faced with a complex problem, some people like to break it down into many small problems and then set about tackling each of these separately. Others will look at the entire problem and work to develop an all-embracing solution, which they then refine over time.

Your results suggest that you can deal with both the details of a situation and the whole picture equally effectively. This ability to work in either way is very useful. You can tackle the details whilst keeping the whole situation in mind. If the problem is one which is best solved in a methodical, logical manner you can use that approach, working through the steps to reach your goal. If the situation demands a more holistic and strategic approach you seem equally able to adopt this methodology.

The Journey Ahead

Introduction

This next section of your report is all about looking to the future. We have assessed and analysed your specialist interests and abilities and now it is up to you to decide how you want to use them.

You will now see a summary of the careers, subjects and options that you have shortlisted and also the ones that we recommended to you. You can go back to the website at any time to update or change these. Each time you do so, this report will update.

Remember, none of this is set in stone. You can re-visit the website whenever you like, to research study and career options or to update the answers to your questionnaires.

Career Suggestions

The career suggestions that you are about to see have been selected from a list of over 600 occupations. We have short-listed them for you because they match your particular abilities and interests.

These are not the only jobs for you to think about. You may have other career ideas that you want to investigate. You can easily do this by visiting our website. Once you add a career to your favourites, it will show up on this report.

Subject Suggestions

The subject suggestions are made based on your results on the various questionnaire and assessments but are also graded according to how useful they would be for the suggested careers and any careers which you have favoured. Ideally these will be subject suggestions which both enable your intended career path(s) and which you will find interesting and well suited to your make-up. But sometimes compromises have to be made and if there is a conflict between needing to study a subject to enter your chosen career and your interest or ability to do well in that subject, then it might be best to speak with an Adviser.

Factors to Focus On

Our career recommendations have all been made by measuring many different factors about you, including your specialist interests, working preferences, aptitudes, personality and working style. Some of these may be more important to you than others. On the website, you can select the factors you want to focus on to tell us how much we should take them into account when making our suggestions. You can re-visit this at any time.

You can also decide how far you want to take your studies. Your career suggestions will be amended accordingly.

Career Suggestions

The longer the rating bar, the better suited the subject is to your interests, preferences, career suggestions and also your career favourites. Before finalising your choices, remember to check that your preferred careers and education routes will remain open to you.

This list of careers takes your personal preferences into account. You can manage this by adjusting the mixer on the website.

Further information about each of these careers and subjects is available on www.morrisby.com.

Selected qualification level: Degree

Sports Scientist

Dietician

Geneticist

Medical Scientist

Consumer Scientist

Radiographer

Audiologist

Clinical Perfusionist

Ergonomist

Chemist (chemical Scientist)

Sport & Exercise Psychologist

Acoustic Physicist

The following careers are closely related to the twelve above, so might also be worth investigating further.

Nutritionist/ Nutritional Therapist

Food Technologist

Cosmetics Scientist

Biochemist / Biotechnologist

Medical Physicist

Planner

Introduction

This page shows a summary of any careers, subjects or courses that have been suggested or that you have added to favourites when using the tools on the website. These subject suggestions are based on your interests and how useful they might be to you in the future. However, you need to consider any specific subjects required by any intended career routes.

You can add or amend these at any time by going back to the website.

Cell, molecular & microbiology

Considering Education

16–18 Choices

Choosing school examination subjects are some of the most important decisions you will make about your education, as they can impact your future career and the choices available to you.

Try to choose subjects that:

- You find interesting and enjoyable so that you can complete the course
- You are good at and that suit your style of learning
- Fit into your future plans.

If in any doubt, you should speak to your school.

18+ Choices

Choosing whether to go straight into employment, take the apprenticeship route or go into higher education can be a difficult decision to make. Higher education is a huge investment in both time and money. If you are choosing this route, be sure that:

- You choose a course that you are good at, you find interesting and that you can do well in
- You choose a university that suits you and your learning style
- The degree fits in with your future and your career aspirations.

Choosing a Career

Throughout this process, we have looked at your aptitudes, aspirations and certain aspects of your personality to suggest and help you discover the different career options available to you. Your career and your future are now in your hands.

Deciding on a career is one of the most important decisions you will ever have to make, so you need to know as much as possible about yourself, about possible careers and how to go about entering them. After interacting with our website and reading this report and perhaps talking it over with your family and careers adviser, you are probably now aware of where your greatest strengths lie and how they fit in with your interests.

You may need to take action soon, such as deciding on subject choices or whether to pursue further study or a more vocational college course, or apprenticeship. If you are considering subject choices, it is important to make sure that you do not shut off too many options at this point, by dropping subjects which would be essential for a career you are still considering.

We hope that you have enjoyed this process with us and that you have found it to be a thought provoking experience. Do remember that you can log in to our website at any time to return to your results, re-take your aspirations questionnaire and investigate different career options.
